Construction stage financing

Financing of construction in a typical residential development project in Finland:

- YIT's subsidiary YIT Construction sells the contract receivables from Housing corporations (also owned by YIT) to financial institutions
 - Due upon completion
 - Sold in line with the progress of the project
- Customers' down payments 15% of value

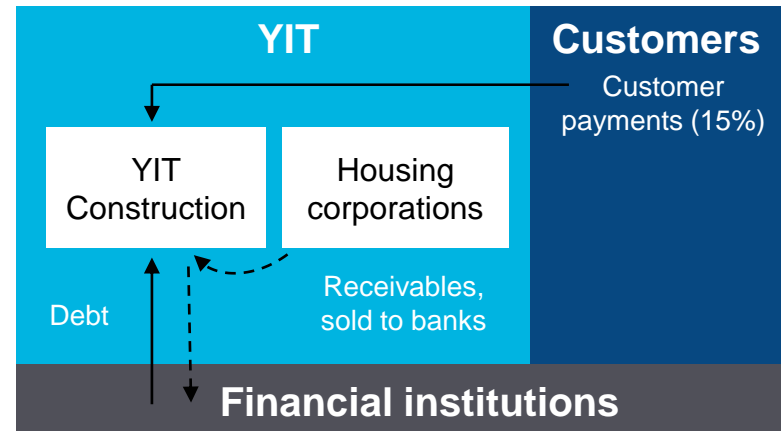

→ Financing for construction

Limited refinancing risk:

- Sold receivables are included in current borrowings as they are linked to current assets. However, there is limited refinancing risk:
- Upon completion, Housing corporations pay for the construction by drawing housing corporation loans
 - 50-70% loan-to-value
 - +20 year maturities
 - The terms and conditions are agreed upon already when starting construction
- Customers pay the rest of the sales price

→ Refinancing of the sold receivables
