Guidance for 2017 raised (segment reporting, POC) on July 13, 2017

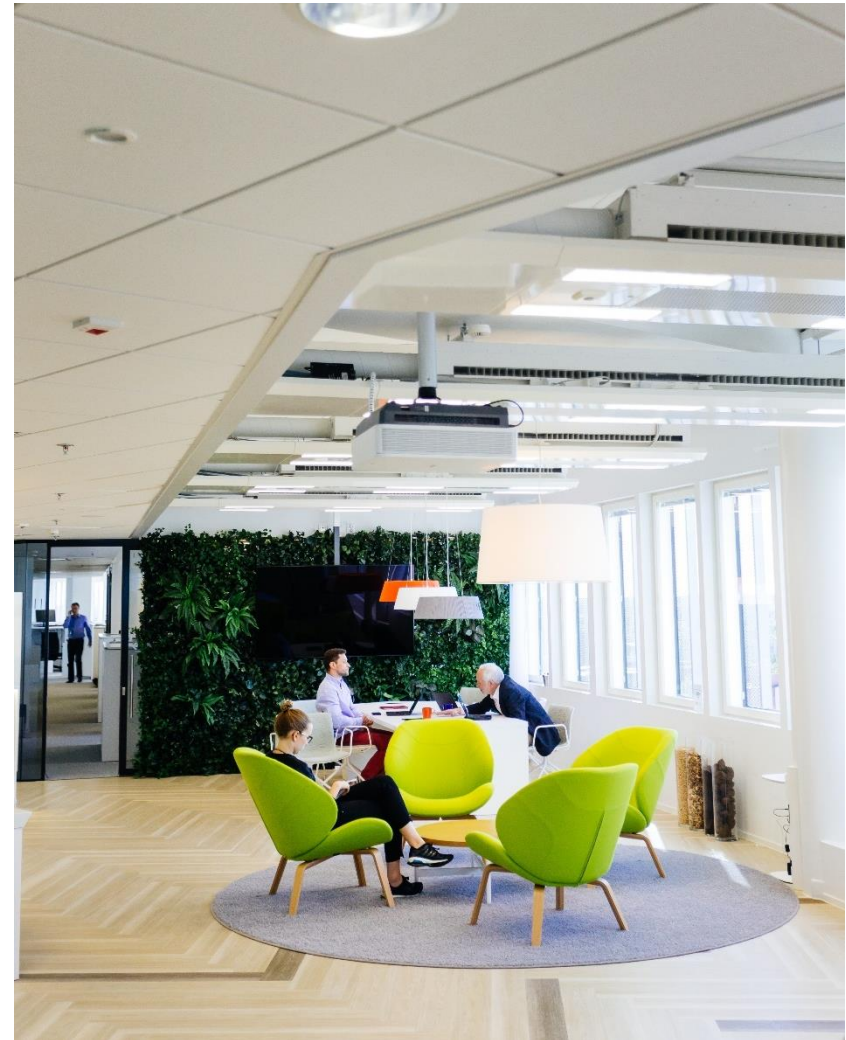

The Group revenue is estimated to **grow by 5–12%**.

The adjusted operating profit¹ is estimated to be in the range of **EUR 105–115 million**.

Previously, the Group revenue was estimated to grow by 0–10% and the adjusted operating profit was estimated to be in the range of EUR 90–105 million.

In addition to the market outlook, the 2017 guidance is based on the following factors:

- At the end of June, 58% of the Group order backlog was sold.
- Projects already sold or signed pre-agreements are estimated to contribute over half of rest of 2017 revenue.
- The increased share of consumer sales in Housing Finland and CEE is likely to have a moderate positive impact on the adjusted operating profit of the segment but the impacts of the shift to consumers will be visible in the result gradually.
- In Housing Russia, the adjusted operating profit is estimated to be positive but to remain on a low level. Capital release actions in Russia are likely to have a negative impact on the profitability.
- Regarding the sales process of the Kasarmikatu 21 office project in Helsinki, based on the price and terms indications from potential investors and ongoing further negotiations YIT estimates that the transaction will be completed by the end of 2017. The transaction has a positive impact on the Group's adjusted operating profit.

¹The adjusted operating profit does not include material reorganisation costs, impairment or other items impacting comparability

Construction stage financing

Financing of construction in a typical residential development project in Finland:

- YIT's subsidiary YIT Construction sells the contract receivables from Housing corporations (also owned by YIT) to financial institutions
 - Due upon completion
 - Sold in line with the progress of the project

- Customers' down payments 15% of value

→ Financing for construction

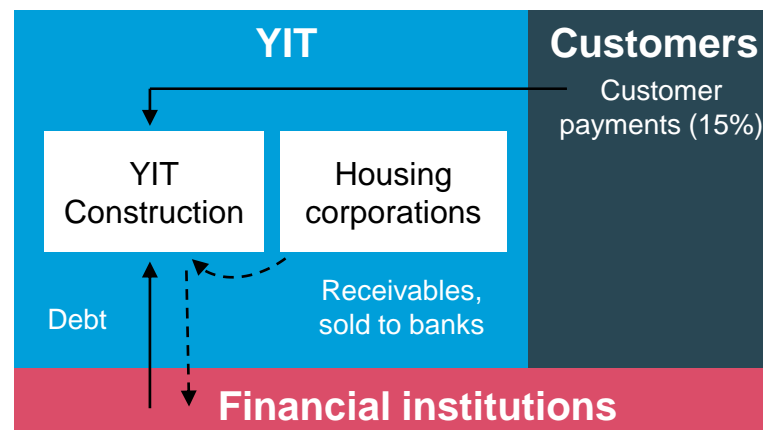

Limited refinancing risk:

- Sold receivables are included in current borrowings as they are linked to current assets. However, there is limited refinancing risk:
- Upon completion, Housing corporations pay for the construction by drawing housing corporation loans
 - 50-70% loan-to-value
 - +20 year maturities
 - The terms and conditions are agreed upon already when starting construction
- Customers pay the rest of the sales price

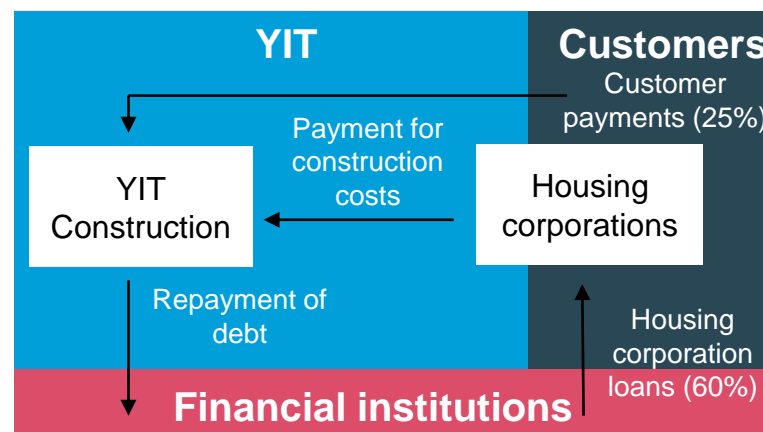

→ Refinancing of the sold receivables

- After completion the unsold apartments are in YIT's balance sheet as shares in housing corporations. Their share in the housing corporation loans is included in current borrowings as the loans are linked to current assets.
